ABOUT US

Since 2002, **Samys International** has grown into a globally recognized leader in knitwear manufacturing. Based in **Tirupur, India**, we specialize in premium garments crafted from **pure cotton, organic cotton, polyester, and spun fabrics**.

Driven by **innovation, sustainability, and ethical practices**, we deliver world-class apparel that combines style, comfort, and environmental responsibility. Every garment reflects our commitment to **quality craftsmanship** and a greener future.

At **Samys International**, we go beyond making clothes—we create lasting impressions with garments that inspire trust and style, tailored for discerning global clients.

SAMYS

INTERNATIONAL

PRINTING & EMBROIDERY

Our advanced production units ensure top-quality and efficiency. With automatic M&R machines, we produce 26,000 pieces daily, supporting up to 20 colors per design. Our embroidery unit specializes in logo and intricate designs on fleece and jackets, delivering flawless craftsmanship with state-of-the-art machines.

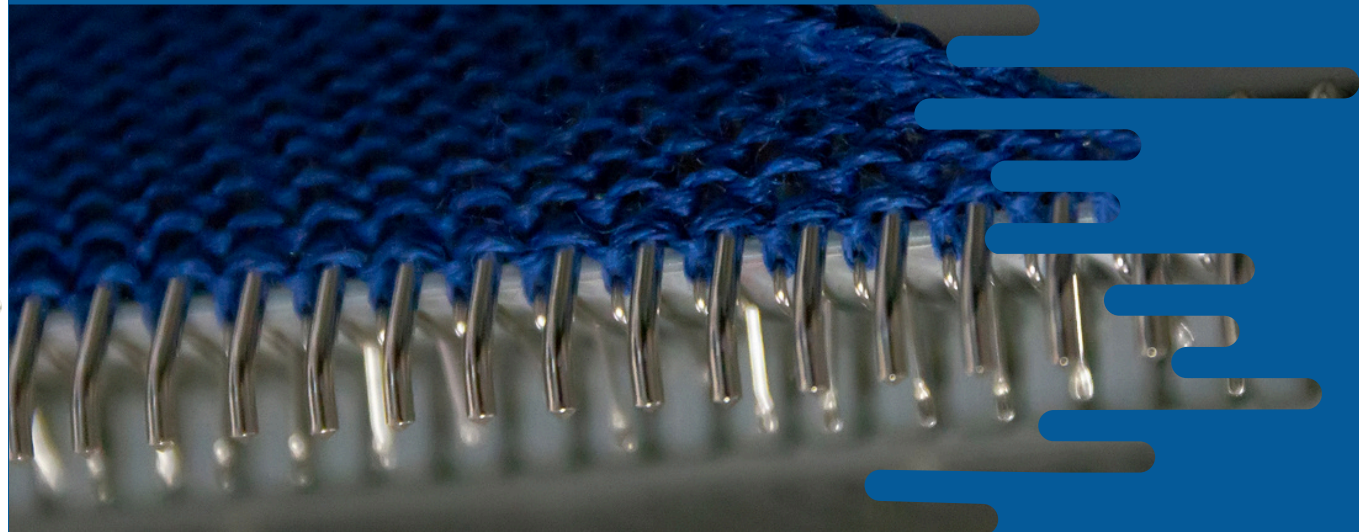

CUTTING & SEWING

We have modern hand cutters, pattern-cutting machines, and the largest range of sewing machines, enabling us to meet a daily production demand of up to 3,000 sets of pyjamas.

KNITTING & DYEING

We produce an assorted range of knitted fabrics in various designs and textures using advanced Mayer & Cie machines from Germany & Pailung circular knitting machines from Taiwan.

Soft flow dyeing machines with colour-retaining ability form an integral part of the facility. All the fabrics are pre-dyed using azo-free technology.

CHECKING ,IRONING & PACKING

Comprehensive inspection ensures every garment is flawless, followed by automated ironing and eco-friendly packing with certified materials.

SUSTAINABILITY

Sustainability remains at the heart of our business as we continuously adapt and transform to meet the evolving needs of the industry and the environment. As a fast-responsive manufacturer, we use eco-friendly materials to minimise waste and optimise energy efficiency, we prioritize sustainability across all operations. We produce 100% recycled, sustainable products, ensuring minimal environmental impact while maintaining high quality and performance.

GREEN

Organic Cotton & Bamboo reduce environmental impact while ensuring comfort and durability.

GREENER

Alternative Fibres
Fibres like Tencel, Modal, Linen, and Hemp offer lower ecological impact, reducing water and land use.

NOT (YET) GREEN

Some products still lack sustainable materials, but we aim to phase these out in the future.
